**DIST.** 23 January 1947**ORIGIN****PAGES****SUPPLEMENT**

25X1X6

1. On the night of 9-10 October 1946, about 0400 hours, six rocket-like missiles were sighted above Forst (A77), proceeding at five minute intervals from northeast to south, in the general direction of Neissewasser (AY4). These missiles are said to have radiated light at both nose and tail.
2. Two other sources, who claim to have made some investigation of the matter, state that such weapons are being fired from a location along the Polish border area. They do not believe that launching sites exist in the Gotthus-Guben-Forst region.
3. On 11 October, these sources observed three such missiles moving at ten minute intervals. On 13 October, four more passed at fifteen minute intervals.

25X1A6a

Comment: A previous report dated 20 September - 2 October stated that guided missiles "are alleged to have been launched from this area", referring to the Polish border.)

This document is hereby regraded to CONFIDENTIAL in accordance with the letter of 16 October 1973 from the Director of Central Intelligence to the Archivist of the United States.
